

### **Keith A. Heasley**

I graduated in 1981 with a B.S. in Mining Engineer from The Pennsylvania State University. I was then employed as a project engineer for underground mines in the Midwestern Region of Consolidation Coal Company until I returned to graduate school in 1984. I finished my Masters of Science degree in Mining Engineering from The Pennsylvania State University in 1987, and my Doctorate in Mining Engineering from the Colorado School of Mines in 1998.

From 1986 until August 2001, I was employed by the former U.S. Bureau of Mines and then the National Institute for Occupational Safety and Health (NIOSH) at the Pittsburgh Research Laboratory. Since August 2001 I have been a Professor in the Mining Engineering Department at West Virginia University. My research interests are numerical modeling, computer applications in mining, multiple-seam mine design and ground control.
