

Susan B. Bealko has worked for the National Institute for Occupational Safety and Health, Pittsburgh Research Laboratory as a Mining Engineer since July, 2000 in many fields of mining research including mine emergency response, mine rescue, ground control, ventilation, communications, ergonomics, and training. Prior to joining NIOSH, she was employed by CONSOL PA Coal Company at their Bailey Mine from 1994 to 2000 as a Production Employee, Fireboss, and Mining/Industrial Engineer. She has Pennsylvania Assistant Mine Foreman certification and is approved by MSHA to be a Part 48, Safety Training Instructor for Surface and Underground Coal Miners. Susan has a B.S. in Mineral Engineering from The Pennsylvania State University, an M.S. in Safety and Environmental Management from West Virginia University, and an MPH in Environmental and Occupational Health from the University of Pittsburgh. In 2004, she received the national Society of Mining Engineers (SME) J.W.Woomer Young Engineer Award.
