

Carbon Capture and Storage: A Workshop for Engineers

Presented by Steven M. Carpenter
Director-Carbon & International Business
Marshall Miller & Associates

Thursday, August 12, 2010
Hilton Garden Inn-Southpointe, Canonsburg, PA
8:00 am - 12:00 noon
Lunch will be served following the workshop

Sponsored by the Pittsburgh Section-Society for Mining, Metallurgy & Exploration, Inc.

This half day workshop will present and assess the technology issues presented by development of large scale commercial application of carbon capture and geological storage to the combustion of coal for the coal generation of electricity.

Mr. Carpenter has 25 years experience in the engineering and construction markets. He is a Subject Matter Expert for carbon and risk issues for the IOGCC, CSA and ISO. As Director of Carbon Management, Mr. Carpenter is responsible for the overall development and implementation of all carbon related projects including the DOE's SECARB coal seam project in Virginia.

Participants who complete the half-day workshop will earn four [4] Professional Development Hours.
